# The proposed Deportation ("Return") Regulation

What is it?
Why does it matter?
How can we mobilise?

Many people are worried about what is happening in the United States, particularly when it comes to immigration enforcement.

While the context in the European Union (EU) differs, migration is increasingly treated as a security issue on both sides of the Atlantic through expanded detention, faster deportations and growing use of raids, surveillance and checks in everyday life.

The EU – including your government and elected members of the European Parliament – are currently negotiating rules that would make it mandatory for authorities to identify, track, detain and deport undocumented people by expanding so-called 'detection measures'.

PICUM
For undocumented migrants,
for social justice.

Take action

This is a moment for collective action. Across Europe, people are already mobilising to oppose detection measures and immigration raids. You can add your voice and strengthen this momentum in different ways.

Join and support existing mobilisation

- **Sign the WeMove petition**. More information and next steps will follow.

- Follow dedicated social media pages to stay aware and join campaign actions like **@WeKeep_UsSafe** (Instagram)

Help spread the word

- Organise discussions in your workplace, organisation or community
- Help make this information accessible by translating or adapting it for different audiences (contact us if you'd like support)

Put pressure on decision-makers

- Contact your Members of the European Parliament to let them know that we are watching and asking them to reject the law.

Act locally – in your city

- Contact your local City Council or city representatives and ask them to take a stand against this EU law and fulfil their mandate to guarantee services and protection to all inhabitants
- Mobilise with others in your community, including through public meetings, collective statements, or peaceful protest
